

Posted 7-Jul-09

Beginning July 15, 2009, Minnesota group purchasers and health care providers will be required to exchange health care administrative transactions electronically. Electronic billing is expected to reduce administrative costs, improve efficiencies and create faster results for both providers and payers.

Broadspire's current eBilling agent for Texas, Ingenix Workers' Compensation Clearinghouse (IWCC), will also be used for Minnesota's electronic exchange of health care administrative transactions. Broadspire is pleased to be working with IWCC to meet the Minnesota mandates and give providers a complete end-to-end workers' compensation eBilling solution.

All payers have been provided with a national five-digit payer ID. To route your electronic bill to Broadspire, please utilize **Payer ID TP021**. Additional information on how to submit electronic bills and receive electronic remittance notifications can be located at the IWCC website <https://wcc.ingenix.com/tpp/resources.php>

Detailed information for electronic billing, reimbursement, and documentation for the state of Minnesota can be located on the Minnesota state Web site www.health.state.mn.us/asa/rules.html
